

# Online Applications System Requirements

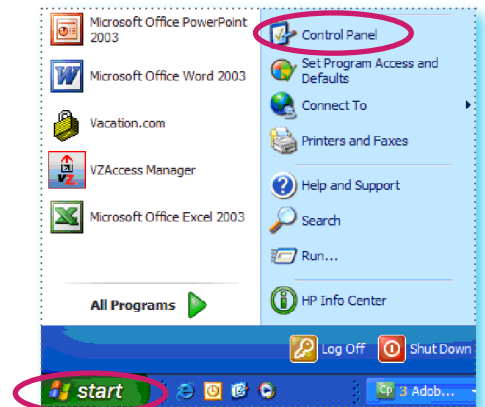

Vacation.com offers a variety of online tools through our agency portal, [www.AgentNet.com](http://www.AgentNet.com). These tools are powered by a variety of internal and external sources and this document is meant to give guidelines for minimum system requirements.

COMPONENT	RECOMMENDED	SUPPORTED
<b>Operating System:</b>	Windows XP	Windows 2000 Vista Windows 7 (Professional/Home Premium)
<b>Processor:</b>	500 MHz Pentium III (Higher if using a more current OS)	500 MHz Pentium III
<b>RAM:</b>	2GB (Higher if using a more current OS)	256 MB
<b>Browser:</b>	Internet Explorer 7	IE8 Other browsers; Firefox, Chrome etc. may be functional but are not specifically supported.
<b>Internet Connection:</b>	Cable Modem	56Kbps DSL or better
<b>Plug Ins:</b>	Adobe Flash Player 7.0 Adobe Acrobat Reader 6.0	

Note: Macintosh OS and Safari browser are not supported although PC emulators are available that give access to Internet Explorer. That configuration is not ideal and technical issues that occur are not supported by Vacation.com

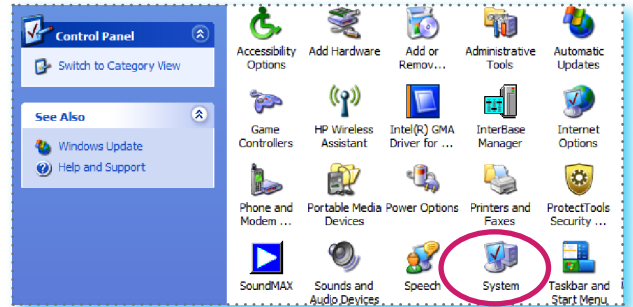

## IDENTIFYING YOUR OPERATING SYSTEM

1. Click on the "Start" menu on your Desktop and select "Control Panel" from the menu.

# IDENTIFYING YOUR OPERATING SYSTEM (CONTINUED)

- From the Control Panel page, click "System."

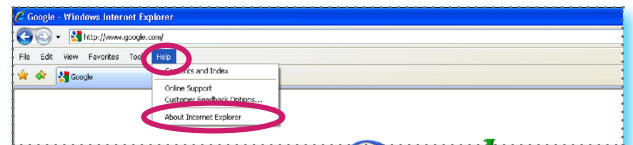

- Click the "General" tab, and the name of the operating system is displayed.

# IDENTIFYING YOUR BROWSER

- Open the Internet on your computer.

- Select Help from the menu.

- Select About Internet Explorer from the dropdown menu.

- Details about your browser display here:
